AMENDMENT

Responsive to the Office action dated June 21, 2002, Paper No. 22, please amend the subject application as follows:

In the Claims

In accordance with 37 C.F.R. § 1.121(c), Applicants submit the following clean set of all pending claims.

- Sub
F1
1. (Thrice Amended) In a computer having a main memory, a method of enhancing scalability of server applications, comprising:
- executing an application component under control of an operating service, the application component having a state and function code for performing work responsive to method invocations from a client;
 - providing an interface for the operating service to receive an indication from the application component that the work is complete;
 - maintaining the state in the main memory between the method invocations of the function code by the client in the absence of the indication from the application component that the work is complete; and
